FORCE JET

CHLORINATED DISHWASHER DETERGENT

DESCRIPTION

FORCE JET is an advanced development in dishwashing technology and ensures a high standard of cleanliness of all tableware.

APPLICATION

FORCE JET when use in all types of institutional dishwashing machines provides outstanding and reliable cleaning of tableware, cutlery and glasses with every wash. It also removes tannin stains from cups and pots.

FORCE JET also minimizes and controls scale and stains build-up on the inside of the machines.

FEATURES

- High powerful concentrate
- Tough on hard-to-remove soils
- Efficient even in presence of hard water
- Reduces frequency of regular de-scaling of machines
- Easy rinsing and do not leave water spots or streaks

METHOD OF USE

FORCE JET is automatically metered and dispensed to the wash water with detergent control system. Dilution is highly economical at 0.1% to 0.3%.

FORCE JET when used as directed is corrosion safe on all metals except aluminium utensils.

SAFETY

This product is caustic and contact with skin and eyes must be avoided. Do not store in direct sunlight and product container must be kept securely closed. This product develops gas and opening of the container in hot environment must be caution.

PACKING

30 kg
